The Connective “czy” in Polish Viewed as a Conjunction

The article is a continuation of my deliberations on the connective ‘czy’ (equivalent to ‘or’ in English) as the natural language equivalent of the functors in logic.

I showed that the connective ‘czy’ can also be the equivalent of the functor of conjunction and not, as I mentioned before, of the functors of inclusive or exclusive disjunction only.

Keywords:

connective, the ‘czy’ connective, conjunction
